

# COIN RISK RATING (CRR)

**PUBLICATION DATE SEPTEMBER 15, 2022**

---

## OVERVIEW

The purpose of this publication is to inform the Shield Coin and crypto community what level of risk-sharing Shield Coin has assigned to each project included in this publication. This should **NOT** be considered financial advice and crypto enthusiasts are encouraged to conduct their own independent research. (**Note:** projects that are not listed in the Coin Risk Rating (CRR) publication are considered high-risk for the purpose of Shield Coin's cryptosurance coverage. Additionally, only the 'original', 'official', or 'first token' of the same name across blockchains hold the following designated rating. **End note.**) All ratings can change overtime.

## LOW RISK PROJECTS

Shield Coin designates projects low risk that have met Shield Coin's threshold for reliable underlying business fundamentals, broad adoption, sufficient capitalization, and active flagship utilities that independently or collectively facilitate the projects' ability to thrive and grow. We have also deemed these the lowest risk for being a scam or rug pull. Therefore, Shield Coin will insure these projects up to a 100% of a holder's original investment (or cost basis).

## MEDIUM RISK PROJECTS

Shield Coin designates projects medium risk that have significant growth potential but lacks a fundamental item including an unlaunched flagship utility, has not yet reached large scale adoption, or other criteria that has not met the Shield Coin criteria to be classified as low risk. Projects in this category will be insured up to 50% of a holder's original investment (or cost basis).

## HIGH RISK PROJECTS

Shield Coin classifies projects as high risk that has one or more red flags that indicate the project is a scam, could become a scam, or relies on risky business models which can lead to extreme volatility. Projects in this class usually meet one or more of the following criteria: (1) no underlying utility, (2) an extremely common utility with a lot of competition, (3) contract red flags, (4) lack of financial data, (5) minimal information to evaluate the project, or (6) risky business fundamentals. Projects in this category will not be insured. Holders who choose these tokens take on 100% of the risk for these projects.
